

SOLUTIONS FOR CENTERS & DEPARTMENTS

Labnodes is Vanderbilt's research network that connects people, communities and information. Groups such as centers, departments and institutes can benefit from the organizational and management tools available via Labnodes in order to promote their message to various audiences.

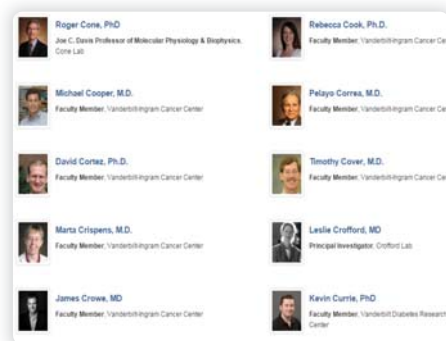

Identity & Vision

Design and create a high-impact and context-rich landing page, which supplements the standard community pages and features.

Reach a greater audience with the high search engine visibility that Labnodes provides.

Control your brand and content.

Manage Faculty, Staff & Trainees

Maintain lists of people using an easy-to-use web interface.

Everyone can manage their own profile - or delegate the task to an administrator.

All profile data is re-usable throughout Labnodes and is accessible through an API if you would like to use it in other web or mobile applications.

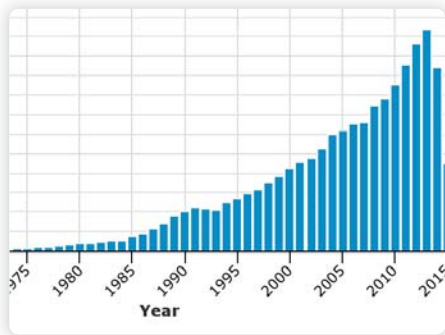

Organize Labs & Cores

Organizational hierarchies are possible and provide you with the power to have all your labs and cores listed and promoted in one place.

Labs and cores can exist in multiple centers or departments, therefore eliminating redundancy in content management.

SOLUTIONS FOR CENTERS & DEPARTMENTS

Citation Lists & Impact

Communicate high-impact research by maintaining a list of citations.

Feature your top-ranked citations as an indicator of impact.

Work with the Labnodes team to create custom publication datasets and tools.

Wed	Thu	Fri
27	28	
Beta Cell Interest Group (BIG) Weekly Seminar	SPRING Meeting Labnodes Planning	
	Quaranta Lab Labnodes Training	
6	7	
Beta Cell Interest Group (BIG) Weekly Seminar		Third Advisory Committee Meeting

Schedule & Share Meetings

Schedule faculty meetings or seminars.

Upload and share presentations, agendas, documents and more.

Reduce inter-organizational redundancies by sharing seminar data.

Get Started Today
