

Embed a Google Calendar to a Resource

Key Concepts

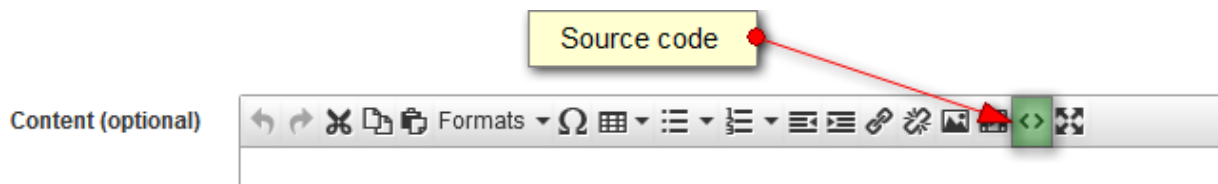

1. Embed a Google calendar
2. Embed calendar HTML code

Additional help is available via labnodes@vanderbilt.edu.

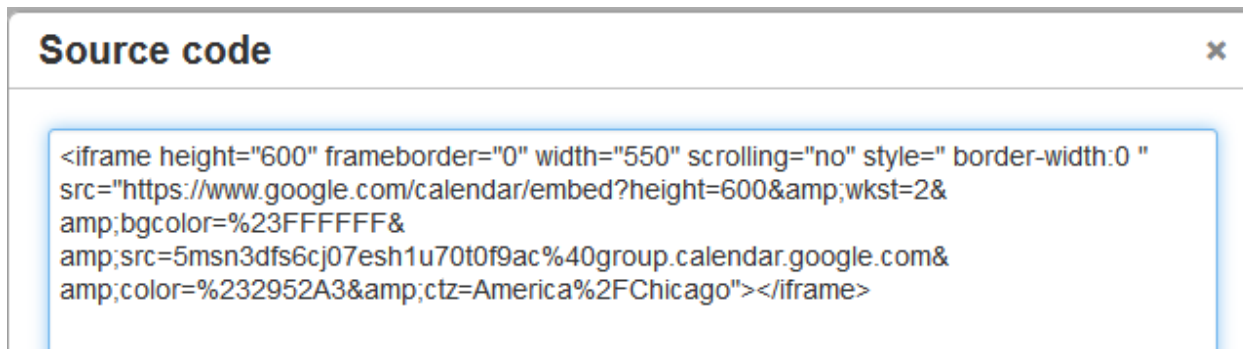

Identify and embed the source code

In order to embed a Google calendar into your Labnodes resource you must identify the code for your Google calendar and copy/paste that code into the desired resource or collection.

1. To obtain the code for your calendar, follow the instructions at:
<http://google.about.com/od/toolsfortheoffice/ss/embedCalendar.htm>.
2. **Copy** the code.
3. Navigate to the Labnodes resource/collection you wish to insert the calendar into and select **Edit** from the **Actions** drop down menu.
4. Click on the **source code icon** in the menu bar of the Content box.

5. **Paste** the source code into the box.

6. Click **Update Document** at the bottom of the page.

NOTE: If the Google calendar is no longer shared or if it is removed, it will not be visible in Labnodes.
