

Workshop Goals

Everything you always wanted to know about Labnodes, but were afraid to ask

- Identify your primary community and feature it in your Labnodes profile. Include secondary and tertiary affiliations as well.
- Provide links to featured resource collections on your community profile page.
- Learn how to set your email preferences and receive emails as they are generated, or in one daily digest.
- Send a private message to another Labnodes user and view your messages on your Dashboard page under the Recent Notification section.

Training Topics

- Manage your affiliations
- Feature collections
- Control Labnodes email frequency
- Send a private message
- Motivate members to enter data

Self-Help

Need a refresher? Know someone who could not attend the training? We have resources available:

General Help
