Our Five Cores

The Vanderbilt Center for Diabetes Translation Research consists of Five Cores:

1) **Translational Methods Core** led by Russell Rothman, M.D. MPP & Shari Barkin, M.D. MSHS

2) **Community Engagement Core** led by David Schlundt, Ph.D.

3) **Behavioral Intervention Technologies and Services Core** led by Sarah Jaser, Ph.D.

4) **Community Outreach & Health Disparities (COHD)** led by Margaret Hargreaves Ph.D.

5) **Administrative Core**

The CDTR and its five cores provide services to investigators with externally funded, diabetes-related translational research addressing the following areas: innovations in care, community engagement, culturally-sensitive/competent interventions, clinical trials, quality improvement, quality assurance, health services research, environmental studies, & community-based participatory research.

The Center for Diabetes Translation Research is supported by NIH grant DK092986. Please acknowledge this in your publications.
