

# Translational Pathology Shared Resource

## Our Mission

Keywords: [Core](#) [translational pathology](#) [shared resource](#) [MMPC](#) [histology](#) [biomedical research](#) [tissue specimens](#)

[Expand](#)

The Translational Pathology Shared Resource will advance biomedical research and personalized medicine by providing Vanderbilt Investigators:

- Access to consented and de-identified human tissue specimens
- Comprehensive, state of the art diagnostic, necropsy and comparative pathology services for animal model systems with specific expertise and focus on mouse models
- Research histology including advanced techniques, immunohistochemistry, laser capture micro-dissection and tissue micro-array preparation
- Access to experts in veterinary and human pathology

## Contact Us:

### Comparative Pathology

Phone: 615.322.3667

Room: MCN S1310

### Human Tissue Acquisition

Phone: 615.343.3274

Room: TVC 4902

### Immunohistochemistry

Phone: 615.322.3667

Room: MCN S1310

### Research Histology

Phone: 615.322.3667

Room: MCN S1310
