A landing page is a content-rich user-friendly single page that provides as much information as is needed to describe a shared resource (core facility), center, department, institute or other large program. All, or most, information can be drawn from a Labnodes community, where the customer has the ability to manage content via easy-to-use content management tools.

Standard features of a landing page include:

- Logo
- Navigation bar - navigation will target specific Labnodes pages that you want visitors to easily find
- Search tool - provide a resource search tool to allow your visitors to quickly find information
- Media scrolling banner - to include 5 or less images or embedded videos
- Content widgets, which update automatically based on Labnodes community updates. Pick from:
  - About the community
  - Calendar/meeting
  - Publication/citation listing
  - Faculty/member listing
  - News & events
  - Contact
  - Generic and custom text
- URL - the URL for the landing page will be in one of the following formats, where "landing_page_name" is replaced by your chosen entity name:
  - http://labnodes.vanderbilt.edu/landing_page_name
  - http://www.landing_page_name.org
- Search engine visibility - the landing page is highly search engine optimized (SEO) and will be actively submitted to major search engines

A landing page can also incorporate information or data from other sources outside of Labnodes. Please inquire to discuss your exact needs.

Notes: Logo design, media preparation and domain name registration will incur additional costs.

Examples

Vanderbilt Center for Stem Cell Biology (VCSCB)
Visit https://www.vcscb.org

Vanderbilt Diabetes Research and Training Center (DRTC)
