

Release notes for Version 2.13 of Labnodes

Keywords: [release notes](#) [new features](#)

[Expand](#)

We have resolved **20** ticketed new features, tasks, bugs, or improvements. Significant improvements are listed below.

Highlight

Labnodes has launched its fourth citation survey for S10 Shared Instrumentation, in joint collaboration with the VU Vice Provost for Research & VUMC Executive Vice President for Research. In compliance with the National Institutes of Health, Labnodes is being used to help collect data regarding usage of S10 Shared Instrumentation Grant Awards received in the last five years.

New Features & Improvements

- **NEW** Added support for an author's maiden name for rendering authorship position in a member profile's publication graph. To use, edit your member profile contact page and add your maiden name, then reload the publication graph.
- **NEW** Added ability to export publication database results as PMID list. (Please inquire about usage)
- **NEW** Added mouse strain ID fields for Jackson Laboratories Stock Number and TMESCSR VUCMR Identifier for cryo-preserved stocks.
- **NEW** Added ability to search and sort collections by a specific, numerical resource ID
- Removed subcommunity label preference from community types that do not support subcommunities.
- Login and password reset pages have been improved for language and user experience.
- Language improvements in member management areas and elsewhere.
- Labnodes branding in emails and online are now consistent.

Bug Fixes

- Fixed file upload error for large files
