## Type 2 Diabetes Drug Study

The purpose of this study is to achieve glycemic control with a drug intervention in patients with Type 2 Diabetes.

To qualify to participate:

- 18 years to 80 years of age
- A known history of Type 2 Diabetes receiving diet alone or oral antidiabetic drugs (including insulin secretagogues, pioglitazone, DPP4 inhibitors, or metformin as monotherapy or in combination therapy, or low-dose insulin at <0.5 unit/kg/day)
- Discharged after hospital admission from general admission from general medicine and surgery services (non-Intensive Care Unit setting)
- BMI range: > 25 Kg/m<sup>2</sup> and < 45 Kg/m<sup>2</sup>

## How to Participate

To participate, contact Jonathan Williams at (615) 875-9200 or e-mail at [jonathan.m.williams@vanderbilt.edu](mailto:jonathan.m.williams@vanderbilt.edu).
