Type 2 Diabetes Cardiovascular Study

The purpose of this study is to evaluate major cardiovascular events in patients with Type 2 diabetes in conjunction with treatments.

To qualify to participate:

- Be 40 years of age or older
- Women must be post-menopausal or using a highly effective method for avoidance of pregnancy
- Have Type 2 diabetes diagnosis
- Established cardiovascular disease with at least one of the following - coronary artery disease, cerebrovascular disease, or peripheral arterial disease
- HbA1c >7.0% (53 mmol/mol) (based on the most recent documented laboratory measurement within 6 months)
- Able and willing to provide informed consent

How to Participate

To participate, contact Dianne Davis at (615) 936-1140 or e-mail at dianne.davis@vanderbilt.edu.
