

Reopening of the Vanderbilt Genome Editing Resource

The Vanderbilt Genome Editing Resource (VGER) has been approved to implement Phase I of Vanderbilt's Research Ramp-Up Plan. VGER is now accepting new mouse genome editing projects and will resume performing procedures beginning the week of May 26th, 2020.

During Phase I of the ramp-up, all communications will be by email or virtual meetings with VGER staff. Appointments to collect reagents can be scheduled upon request.
