CHRIS WRIGHT, D.PHIL. & GUOQIANG GU, PH.D. BECOME VCSCB FACULTY INVESTIGATORS

Keywords: [vcscb news](#)

[Expand](#)

[Chris Wright, D.Phil.](#) and [Guoqiang Gu, Ph.D.](#) both recently moved their laboratories from MRB-III to the 9<sup>th</sup> floor of MRB-IV (Langford). With their move into space assigned to the VCSCB, they become VCSCB faculty investigators, a designation used to indicate that fact. More importantly, this move positions their labs closer to the labs of several other VCSCB faculty members, including Scott Baldwin, Bob Coffey, Maureen Gannon and Mark Magnuson. A key part of the rationale for both Chris and Gu to move was to better align the activities of the Program in Developmental Biology, led by Chris Wright, with those of the Center.
