

Practical Workshop in Mouse Genome Informatics (MGI)

Sponsored by the Vanderbilt Center for Stem Cell Biology

MGI is a free, highly curated database resource for genetic, genomic and phenotypic information pertaining to the laboratory mouse and mouse models of human disease. Contact mgi-help@jax.org for more information.

Please RSVP to Pam Uttz at pamela.uttz@vanderbilt.edu.

Meeting Details

Start Date / Time	November 12, 2013 at 1:00 PM
End Date / Time	November 12, 2013 at 2:30 PM
Duration	1 hour(s) 30 minutes
Location	411 Light Hall
Presenter Name	Joanne Berghout
Presentation Title	<i>Not provided</i>
Status	This meeting has already occurred

Meeting Agenda/Notes

This workshop aims to cover:

- Brief introduction to mouse genetics and techniques, allele nomenclature and allele types
- How to find a model of human disease
- How to locate and interpret phenotypic data
- Choosing a cre expressing line
- Finding expression information for a gene
- Working with batch data
