## Primer Annotations

|                     |   |
|---------------------|---|
| Sequence            | AAT ACG ACT CAC TAT AGG G               |
| Sequence Length     | 19 nt                                   |
| GC Content          | 42.1%                                   |
| Molecular Weight    | 5,820.9 g/mol                           |
| Melting Temperature | 46.8 ° (Basic, with no salt adjustment) |
| Stock Concentration | 2. µg/µL                                |

## Inventory Location

*Private*
